Churn Rate by AgeGroup

Key Findings

- Female customers show higher churn (25%) than males (16%).
- Germany has the highest churn rate (32%) and revenue risk.
- Customers with 3–4 products exhibit extremely high churn.
- High-balance customers churn more frequently than low-balance customers.
- Retention efforts should focus on German, high-balance, multi-product customers.

Recommendations

Target German customers with retention campaigns.

Investigate dissatisfaction among 3–4 product holders.

Offer loyalty incentives to high-balance customers.

Increase engagement programs for female customers.

Expected Business Impact

Reducing churn among high-risk customers could help protect approximately \$185.6M in revenue while improving customer retention and profitability.
